

GWEN BASCONCILLO

UI/UX Design • Front-End & Web Development • QA Tester & Documentation

Oriental Mindoro, Philippines | +63 966 695 4800 | gwenbasconcillo11@gmail.com | basconcillogwen.vercel.app

PROFILE

Information Technology graduate focused on UI/UX design, front-end and web development, and quality assurance. Skilled in prototyping, responsive web development, manual testing, technical documentation, and graphic design. Adaptable, detail-oriented, and committed to creating functional, user-friendly, and well-tested digital experiences. Eager to learn, grow, and contribute to a professional team.

EDUCATION

Bachelor of Science in Information Technology

June 2026

Mindoro State University — Calapan, Oriental Mindoro, PH

- Academic Distinction, Dean's Lister (AY 2023 – 2026) · GWA: 1.7405
- Relevant Coursework: Web Development, Database Systems, Software Engineering, Human-Computer Interaction, Systems Analysis & Design, Object-Oriented Programming, Data Structures & Algorithms, Artificial Intelligence, Capstone Project
- Capstone Role: Technical Writer/Documentation · UI/UX Designer · QA Analyst

UNIVERSITY PROJECTS

RM's AI Inventory & E-Commerce System

2026

Capstone Project

UI/UX Designer · QA Analyst · Technical Writer/Documentation

- Contributed to an AI-integrated inventory and e-commerce management system with real-time demand forecasting, built for a live retail client.
- Designed UI/UX wireframes and prototypes, led requirements analysis, and authored full system documentation.
- Implemented end-to-end QA testing and designed the database schema and admin dashboard for stock, sales, and order tracking.

SafePath — Bullying Complaint System

2024

University Project

UI/UX Designer · QA Analyst · Technical Writer/Documentation

- Designed a confidential student safety platform for reporting bullying incidents.
- Integrated AI-powered text classification (TensorFlow & Wit.ai) to automatically flag concerning reports for review.

EXPERIENCE

QA Analyst, Developer & Technical Documentation

2025 – 2026

New San Jose Builders Inc. — Quezon City, PH

- Independently developed DailyDrive, a web-based task management system (PHP, Node.js, MySQL) covering employee time-tracking, an admin dashboard, and reporting modules.
- Wrote and executed test cases, logged defects, and validated system functionality prior to deployment, including the company's Ticketing System, Employee Self-Service System, and Human Resource Management System.
- Collaborated with the development team during sprint reviews and contributed to internal documentation.
